

Home Learning on Seesaw

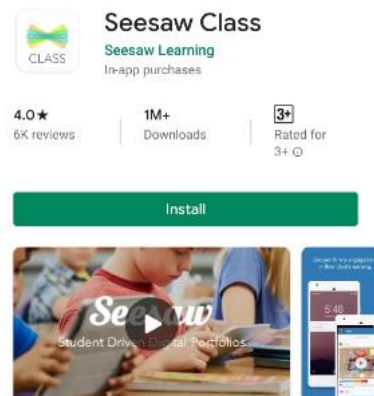

Your child can access Seesaw on a variety of devices - a computer, phone or tablet.

If you are using a computer, you will need to go to the Seesaw website <https://app.seesaw.me>.

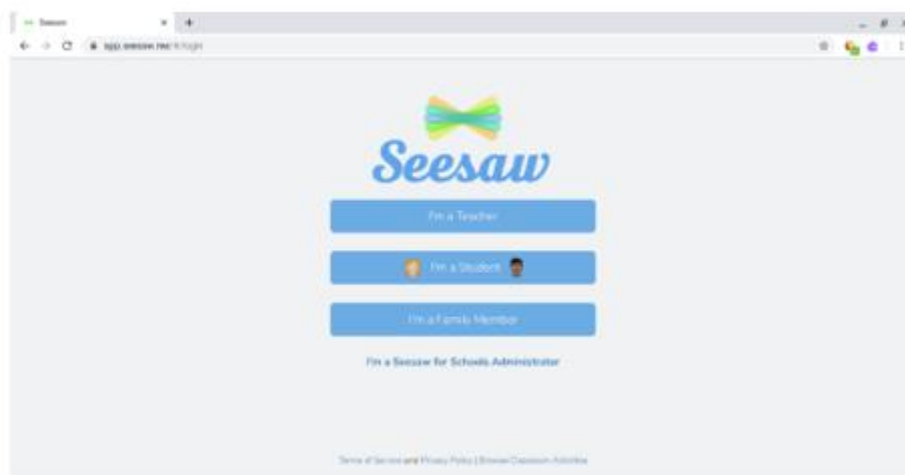

If you are using an iPad, phone or tablet you will need to download the class app from the App Store or Google Play Store.

Home Learning on Seesaw

You may already have the app installed as you may access your child's learning as a family member. If this is the case and you are logged in, you will need to click the red sign out on the top left corner for your child to access their learning.

To log in to your student account click on I'm a student. Your screen may have an additional option, I'm a family member.

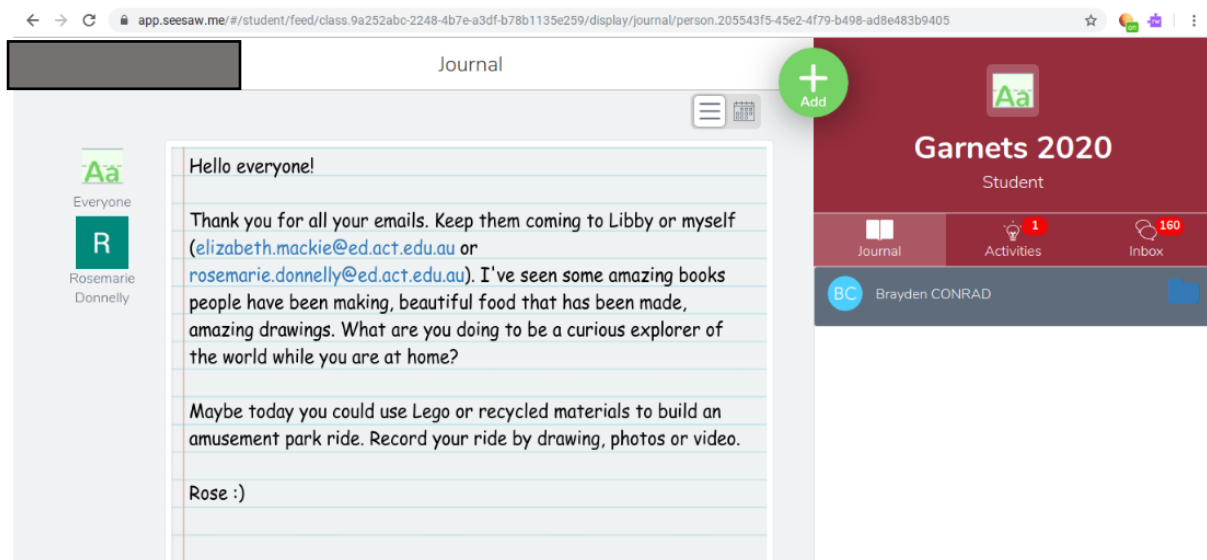

Type your child's code (including the spaces) into the text code box.

Home Learning on Seesaw

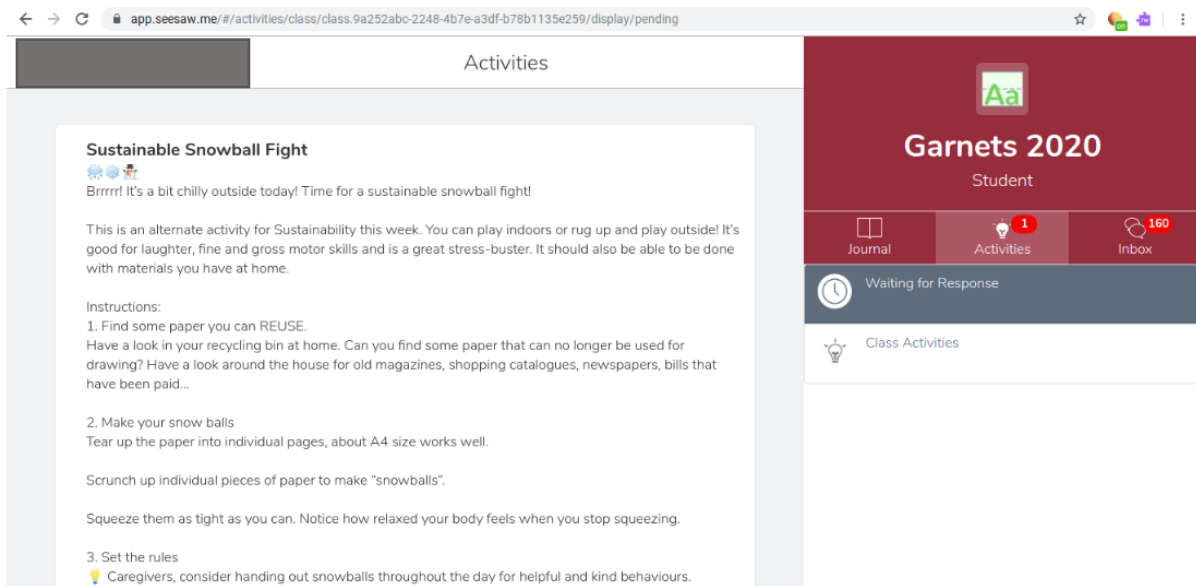

Once logged in your child can post to their journal, respond to activities, and view class announcements.

Once logged in, there may be notifications.

Educators will post in your child's journal and activities for your child to complete. Children will be able to like and comment on posts in the journal feed.

The screenshot shows the Seesaw app interface. The main content area displays an activity titled "Sustainable Snowball Fight" with a description and instructions. The right sidebar shows the user's profile as "Garnets 2020 Student" and navigation options for Journal, Activities (with a red notification badge), and Inbox (with a red notification badge). A "Waiting for Response" button is visible below the navigation bar.

Sustainable Snowball Fight
Brrrrr! It's a bit chilly outside today! Time for a sustainable snowball fight!

This is an alternate activity for Sustainability this week. You can play indoors or rug up and play outside! It's good for laughter, fine and gross motor skills and is a great stress-buster. It should also be able to be done with materials you have at home.

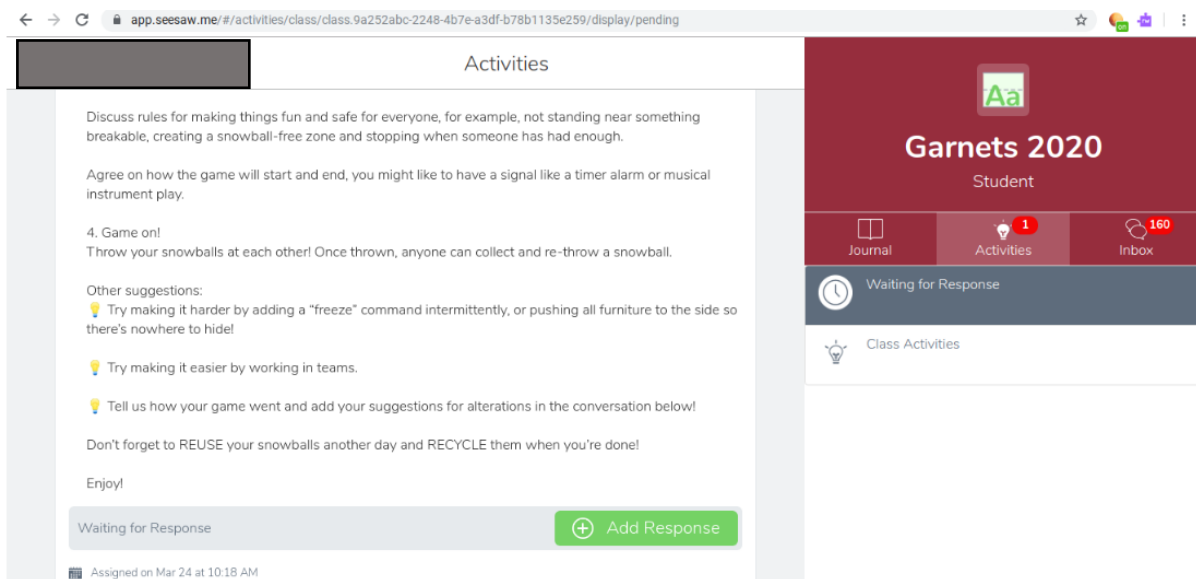

Instructions:

1. Find some paper you can REUSE.
Have a look in your recycling bin at home. Can you find some paper that can no longer be used for drawing? Have a look around the house for old magazines, shopping catalogues, newspapers, bills that have been paid...
2. Make your snow balls
Tear up the paper into individual pages, about A4 size works well.

Scrunch up individual pieces of paper to make "snowballs".

Squeeze them as tight as you can. Notice how relaxed your body feels when you stop squeezing.
3. Set the rules
💡 Caregivers, consider handing out snowballs throughout the day for helpful and kind behaviours.

Activities will have instructions and may require a response. Click the green add response button.

This screenshot shows the same activity page as the previous one, but with the "Add Response" button highlighted. The button is green with a white plus sign and the text "Add Response". Below the button, it says "Assigned on Mar 24 at 10:18 AM".

Discuss rules for making things fun and safe for everyone, for example, not standing near something breakable, creating a snowball-free zone and stopping when someone has had enough.

Agree on how the game will start and end, you might like to have a signal like a timer alarm or musical instrument play.

4. Game on!
Throw your snowballs at each other! Once thrown, anyone can collect and re-throw a snowball.

Other suggestions:

- 💡 Try making it harder by adding a "freeze" command intermittently, or pushing all furniture to the side so there's nowhere to hide!
- 💡 Try making it easier by working in teams.
- 💡 Tell us how your game went and add your suggestions for alterations in the conversation below!

Don't forget to REUSE your snowballs another day and RECYCLE them when you're done!

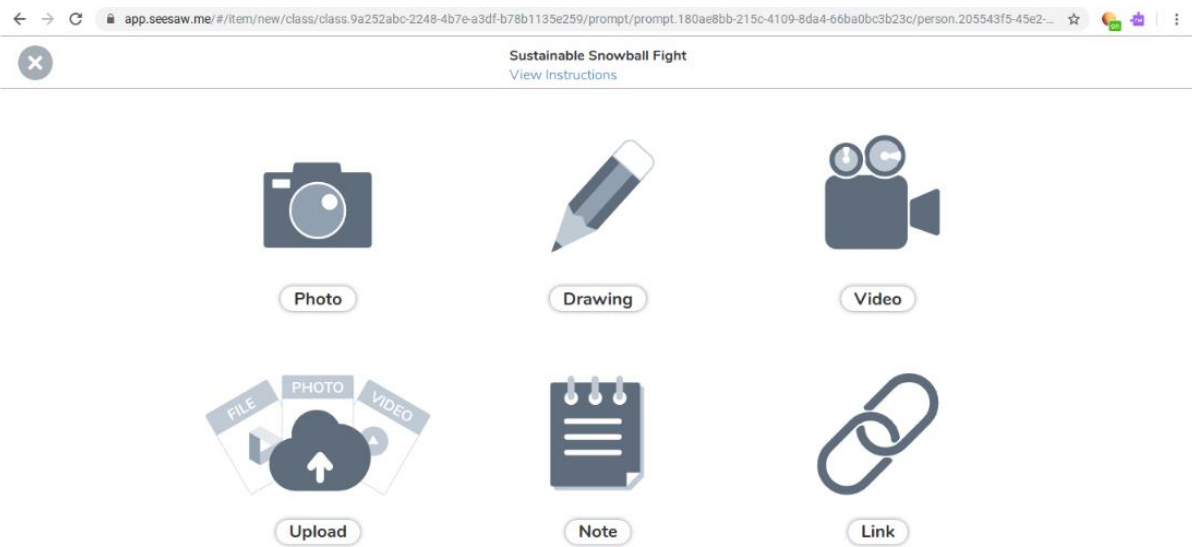

Enjoy!

Waiting for Response ➕ Add Response

Assigned on Mar 24 at 10:18 AM

This response may take the form of photo or video taken on the device, a drawing, a note or uploading a file, photo or video already saved on the device.
